These iconic melodies have remained a part of the pop culture landscape since their debuts in the late 1950s and early '60s: a golden decade that highlighted an era when movie studios and TV production companies employed full orchestral ensembles to provide a jazz backdrop for the suspenseful adventures of secret agents, private detectives, cops, spies and heist-minded criminals. Hundreds of additional films and television shows made during this period were propelled by similarly swinging title themes and underscores, many of which have (undeservedly) faded into obscurity. This meticulously researched book traces the embryonic use of jazz in mainstream entertainment from the early 1950s--when conservative viewers still considered this genre the devil's music--to its explosive heyday throughout the 1960s. Fans frustrated by the lack of attention paid to jazz soundtrack composers--including Jerry Goldsmith, Edwin Astley, Roy Budd, Quincy Jones, Dave Grusin, Jerry Fielding and many, many others--will find solace in these pages (along with all the information needed to enhance one's music library). Aubrey Malone has gone back to the start of the Oscar ceremonies and discovered that mistakes have been made every year in the choice of what has been deemed "best" in the categories of acting, directing, producing and the subsidiary awards. He has identified all the great stars (Garbo, Montgomery Clift, Peter O'Toole, Barbara Stanwyck, etc.) who never held Oscars in their hands, and also iconic directors like Stanley Kubrick who were never thus honored. Why were some people over-rewarded by the Academy and why did others fall below the radar? The author outlines all of the extraneous factors leading to voting choices, and how Oscar pariahs have often been subsequently (or even posthumously) awarded for the wrong films to make up for omissions in a given year. With both wit and wisdom he has written an "alternative" history of the Oscars that will be required reading for both academics and film buffs alike. It tells the story behind the story. So said Peggy Lee, the North Dakota girl who sang like she'd just stepped out of Harlem. Einstein adored her; Duke Ellington dubbed her the Queen. With her platinum cool and inimitable whisper she sold twenty million records, made more money than Mickey Mantle, and along with pals Frank Sinatra and Bing Crosby presided over music's greatest generation. Yet beneath the diamonds she was still Norma Delores Egstrom, insecure and always looking for acceptance. Drawing on exclusive interviews and new information, Peter Richmond delivers a complex, compelling portrait of

an artist and an era that begins with a girl plagued by loss, her father's alcoholism, and her stepmother's abuse. One day she gets on a train hoping her music will lead her someplace better. It does—to a new town and a new name; to cities and clubs where a gallery of brilliant innovators are ushering in a brand-new beat; to four marriages, a daughter, Broadway, Vegas, and finally Hollywood. Richmond traces how Peggy rose, right along with jazz itself, becoming an unstoppable hit-maker (*Fever*, *Mañana*, *Is That All There Is?*). We see not only how this unforgettable star changed the rhythms of music, but also how—with her drive to create, compose, and perform—she became an artist whose style influenced k.d. lang, Nora Jones, and Diana Krall. *Fever* brings the lady alive again—and makes her swing.

pete kelly history time: Against the Seas Mary Soderstrom, 2023-02-28 An incredible read....

While unflinching in her analysis, Soderstrom nevertheless gifts us with a message of hope and resilience. — MAUDE BARLOW, activist and author of Still Hopeful: Lessons from a Lifetime of Activism. What can we learn about coping with rising sea levels from ancient times? The scenario we are facing is scary: within a few decades, sea levels around the world may well rise by a metre or more as glaciers and ice caps melt due to climate change. Large parts of our coastal cities will be flooded, the basic outline of our world will be changed, and torrential rains will present their own challenges. But this is not the first time that people have had to cope with threatening waters, because sea levels have been rising for thousands of years, ever since the end of the last Ice Age. Stories told by the Indigenous people in Australia and on the Pacific coast of North America, and those found in the Bible and the Epic of Gilgamesh, as well as Roman and Chinese histories all bear witness to just how traumatic these experiences were. The responses to these challenges varied: people adapted by building dikes, canals, and seawalls; by resorting to prayer or magic; and, very often, by moving out of the way of the rushing waters. Against the Seas explores these stories as well as the various measures being taken today to combat rising waters, focusing on five regions: Indonesia, Shanghai, the Sundarbans of Bangladesh, the Salish Sea, and the estuary of the St. Lawrence River. What happened in the past and what is being tried today may help us in the future and, if nothing else, give us hope that we will survive.
