Sources for further research include specialized indexes, periodicals, trade associations, and more. Part 3 opens up sources on specific business topics and functions, including new and small businesses, international business, and the federal government, among others. Part 4 shows you how to get valuable state and regional information, including—for each state—a description of its economy, key government offices, data centers and libraries, local publications, and a list of its largest companies and largest in-state employers. To make it even easier to use, the Directory of Business Information is supported by thorough, carefully prepared indexes, and by the inclusion of thousands of phone numbers of business experts in government, corporations, industry associations, publications, and libraries.
