It was the beginning of the Great Depression, which led to our country's economic collapse. The author, also born in 1929, lived through those challenging Depression years, experiencing firsthand the many adaptations and sacrifices needed to survive those trying times. Now some eighty-eight years later, the author looks back to review those key principles that helped folks survive those challenging 1930s. Although the times we are living in today are radically different than in those Depression years, the author holds to the belief that if these same key principles are followed by America's working class today, they will be more successful in meeting the challenge of our ever-changing, complex society. This book offers some suggested guides that should aid today's workers in achieving increased financial independence by following these same key principles, with grandpa's retirement rocking chair as the goal!

country style homes for sale: *Retrospect at 95* Ben Muzzey, 2016-08-02 Ben Muzzey chronicles and celebrates a long life filled with surprising and exciting lessons learned in this debut publication offering a Retrospect at 95. As an engineer, skier, mountaineer, boater and bicyclist, Muzzey has tales to tell. Misunderstood and considered retarded in his early years due to severe undiagnosed dyslexia and myopia, he overcame these obstacles to graduate from MIT in 3.5 years and become a respected engineering manager at Boeing. He details these things and more in this narrative filled with poignant human-interest stories and observations about life. Muzzey looks back at the events that shaped his character and at the people who believed in him and those who didn't. He recalls being nearly penniless and living in the hay in his boss's barn. He describes driving across the country with his second wife Nancy, in a small, unreliable car and surviving for weeks on blackberries and tea; finally camping under a bridge in Seattle rain. There are stories about their colorful neighbors in the tenement that was their first home. There are many surprising episodes, including moving part of his originally decrepit farmhouse to their beautiful Mercer Island waterfront property by tugboat and his employee at Boeing whom he mentored until he was discovered by Upper Management. They announced that they'd found a diamond in a turd and later made him a vice president. The book is lively, inspiring and sometimes outrageous. His wife Ann, states that There are no books like it - Ben's adventures and philosophy are uniquely his own. He encourages readers to be themselves and to consider the amount of risk appropriate for their adventures. His story clarifies this. This romp through one man's fascinating life produces some enriching and widely applicable lessons. - Clarion Book Review
