history textbook class 10: Globalisation and National Identity in History Textbooks Joseph Zajda, 2017-07-06 Globalisation and National Identity in History Textbooks: The Russian Federation, the 16th book in the 24-volume book series Globalisation, Comparative Education and Policy Research, discusses trends in dominant discourses of identity politics, and nation-building in school history textbooks in the Russian Federation (RF). The book addresses one of the most profound examples of the re-writing of history following a geo-political change. Various book chapters examine debates pertaining to national identity, patriotism, and the nation-building process. The book discusses the way in which a new sense of patriotism and nationalism is documented in prescribed Russian history textbooks, and in the Russian media debate on history textbooks. It explores the ambivalent and problematic relationship between the state, globalisation and the construction of cultural identity in prescribed school history textbooks. By focusing on ideology, identity politics, and nation-building, the book examines history teachers' responses to the content of history textbooks and how teachers depict key moments in modern Russian history. This book, an essential sourcebook of ideas for researchers, practitioners and policymakers in the fields of globalisation and history education, provides timely information on history teachers' attitudes towards historical knowledge and historical understanding in prescribed Russian history textbooks.

history textbook class 10: Textbooks in American Society Philip G. Altbach, Gail P. Kelly, Hugh G. Petrie, Lois Weis, 1991-09-27 In recent years, textbooks have been widely criticized for low standards, lack of imaginativeness, and insensitivity to racial and gender issues. Increasingly, they are cited as another weak link in American public education. This book goes beyond the headlines to examine how textbooks are produced, how they are selected, and what pressures are placed on textbook authors and publishers. The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy, the determinants of textbook content, the role of textbooks in educational reform, and the process of selection at the state level. The authors offer current research on textbook policy including perspectives from those directly involved with textbooks—from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction.

history textbook class 10: Narrating the Soviet Era in Russian School History Textbooks

Olga Konkka, 2025-09-03 This study focuses on how Russian history textbooks published between 1992 and 2021 dealt with the topic of the Soviet period (1917–1991). Representations of this part of Russia's past in school manuals have provoked vivid debates and bolstered government intervention in the field, while a gradual shift towards a less critical narrative of the USSR in more recent textbooks is often presented as directed by Vladimir Putin. This study combines research into these texts and inquiry into those who write, publish, approve, or criticize them. Bringing together these perspectives provides a more complex view of school textbooks as final products of both top-down and bottom-up processes. This volume is aimed at postgraduates, researchers, and academics specializing in Soviet history, contemporary Russian politics and society, and history education and textbooks.

history textbook class 10: After Soviet State Antisemitism Yohanan Petrovsky-Shtern, Vladimir Ze'ev Khanin, 2024-10-21 Following the abolishment of state-sanctioned antisemitism under Gorbachev's Perestroika liberalization policy, Jewish life in the (F)SU ([former] Soviet Union) was dominated by two interrelated trends: large-scale emigration on the one hand, and attempts to re-establish a fully-organized local Jewish life on the other. Although many aspects of these trends have become the subjects of academic research, a few important developments in the recent decade have not been studied in depth. The authors of this volume trace these trends using various methods from the social sciences and humanities and focusing on issues pertaining to the physical, mental, legal, and cultural borders of the Jewish collective in the post-Soviet Eurasia; traditional and modern patterns of Jewish ethnic, national, religious, and cultural identities; the development of Jewish organizations and movements; contemporary Jewish religious and civil culture; and the general sociocultural and political context(s) of the FSU Jewish life. This volume will make a robust contribution to research on contemporary Jewish (and other) ethnicities and will enrich public discourses on ethnic, religious, and cultural minorities and their current situation in Europe and the

FSU.

history textbook class 10: Faith and Politics in South Asia Astha Chadha, 2024-11-18 This book explores the role of faith and politics in shaping the international relations of South Asia. Adopting a neo-classical realist framework and a discourse-historical approach to analyze how religious actors construct their political identities and interests through the interpretation of sacred texts, or exegesis, the book makes several key contributions to the field of international relations. It introduces the concept of exegesis as a novel analytical tool to understand the role of religion in world politics. The book argues that exegesis is not only a theological exercise, but also a political one, as it shapes the worldviews, values, norms, and interests of religious actors. The author applies exegesis to three case studies of South Asia: the partition of India and Pakistan, the rise of Hindu nationalism in India, and the emergence of Islamic radicalism in Pakistan and resurging signs of the same in Bangladesh. The research then challenges the conventional assumptions of IR, such as the secularization thesis, the clash of civilizations, and the rational actor model, by showing how religious actors are not monolithic, homogeneous, or irrational, but rather diverse, heterogeneous, and strategic. The book offers a nuanced and comprehensive understanding of the role of religion in world politics, especially in the context of South Asia. Highlighting the diversity and complexity of the religious landscape in South Asia, which is home to various faiths, sects, movements, and ideologies, this book will be of interest to academics studying global politics, international relations, Asian Studies, and studies on religion and foreign policy.
