The Early Years and Education

Lutah Maria Riggs was born in 1896, and by the 1920s, she was already making strides towards becoming a professional architect. During that era, architectural education for women was limited, with many schools either barring female students outright or discouraging their participation. This was a significant achievement given the prevailing gender biases and the scarcity of female role models in the field.

Welter, 2019-11-19 This volume analyzes the extraordinary patronage of modern architecture that the Tremaine family sustained for nearly four decades in the mid-twentieth century. From the late 1930s to the early 1970s, two brothers, Burton G. Tremaine and Warren D. Tremaine, and their respective wives, Emily Hall Tremaine and Katharine Williams Tremaine, commissioned approximately thirty architecture and design projects. Richard Neutra and Oscar Niemeyer designed the best-known Tremaine houses; Philip Johnson and Frank Lloyd Wright also created designs and buildings for the family that achieved iconic status in the modern movement. Focusing on the Tremaines' houses and other projects, such as a visitor center at the meteor crater in Arizona, this volume explores the Tremaines' architectural patronage in terms of the family's motivations and values, exposing patterns in what may appear as an eclectic collection of modern architecture. Architectural historian Volker M. Welter argues that the Tremaines' patronage was not driven by any single factor; rather, it stemmed from a network of motives comprising the clients' practical requirements, their private and public lives, and their ideas about architecture and art.

He sought to ensure that each design he produced--whether a piece of furniture or a building or an interior--was an improvement that responded to modern needs and modern life. Weber was a leading figure of modernism on the West Coast from the 1920s through the early 1950s, and his work greatly influenced the California style of the time. His most iconic designs were his Bentlock line, the Air Line chair, the interiors for the Bixby House, and his tubular-steel furniture for Lloyd. This book, a result of significant new primary research in the Weber family's archives, represents the first major study of the life and career of this important designer. Christopher Long details the full range of Weber's contributions, focusing particularly on the part he played in the advancement of
