Meyer, 2018-09-10 Innovator Award for Edited Collection from the Central States Communication Association (CSCA) Shonda Rhimes is one of the most powerful players in contemporary American network television. Beginning with her break-out hit series *Grey's Anatomy*, she has successfully debuted *Private Practice*, *Scandal*, *How to Get Away with Murder*, *The Catch*, *For The People*, and *Station 19*. Rhimes's work is attentive to identity politics, "post-" identity politics, power, and representation, addressing innumerable societal issues. Rhimes intentionally addresses these issues with diverse characters and story lines that center, for example, on interracial friendships and relationships, LGBTIQ relationships and parenting, the impact of disability on familial and work dynamics, and complex representations of womanhood. This volume serves as a means to theorize Rhimes's contributions and influence by inspiring provocative conversations about television as a deeply politicized institution and exploring how Rhimes fits into the implications of twenty-first century television.

shane from greys anatomy: *The Cultural Politics of Colorblind TV Casting* Kristen J. Warner, 2015-06-05 This book fills a significant gap in the critical conversation on race in media by extending interrogations of racial colorblindness in American television to the industrial practices that shape what we see on screen. Specifically, it frames the practice of colorblind casting as a potent lens for examining the interdependence of 21st century post-racial politics and popular culture. Applying a 'production as culture' approach to a series of casting case studies from American primetime dramatic television, including ABC's *Grey's Anatomy* and The CW's *The Vampire Diaries*, Kristen Warner complicates our understanding of the cultural processes that inform casting and expounds the aesthetic and pragmatic industrial viewpoints that perpetuate limiting or downright exclusionary hiring norms. She also examines the material effects of actors of color who knowingly participate in this system and justify their limited roles as a consequence of employment, and finally speculates on what alternatives, if any, are available to correct these practices. Warner's insights are a valuable addition to scholarship in media industry studies, critical race theory, ethnic studies, and audience reception, and will also appeal to those with a general interest in race in popular culture.

shane from greys anatomy: The Disfigured Face in American Literature, Film, and Television Cornelia Klecker, Gudrun M. Grabher, 2021-11-29 The face, being prominent and visible, is the foremost marker of a person's identity as well as their major tool of communication. Facial disfigurements, congenital or acquired, not only erase these significant capacities, but since ancient times, they have been conjured up as outrageous and terrifying, often connoting evil or criminality in their associations – a dark secret being suggested behind the mask, the disfigurement indicating punishment for sin. Complemented by an original poem by Kenneth Sherman and a plastic surgeon's perspective on facial disfigurement, this book investigates the exploitation of these and further stereotypical tropes by literary authors, filmmakers, and showrunners, considering also the ways in which film, television, and the publishing industry have more recently tried to overcome negative codifications of facial disfigurement, in the search for an authentic self behind the veil of facial disfigurement. An exploration of fictional representations of the disfigured face, this book will appeal to scholars of sociology, cultural and media studies, American studies and literary studies with interests in representations of disfigurement and the Other.
