Kaatz, 2017-03-27 Through a new collection of primary documents about Japanese internment during World War II, this book enables a broader understanding of the injustice experienced by displaced people within the United States in the 20th century. In the 1940s, Japanese and Japanese American internees of Redwood City, CA, had a dedicated ally: J. Elmer Morrish, a banker who kept their businesses alive, made sure their taxes were paid, and safeguarded their properties until after the end of World War II and the internees were finally released. What were Morrish's motivations for his tireless efforts to help the internees? How did the unjustly incarcerated deal with the loss of freedom in the camps, and how did they envision their future? And how did the internees both cooperate with the U.S. government and attempt to resist victimization? *Citizen Internees: A Second Look at Race and Citizenship in Japanese American Internment Camps* is an edited selection from a collection of more than 2,000 pieces of correspondence—some of which is previously unpublished—regarding the internment of Japanese and Japanese Americans from Redwood City, CA. These primary source documents reveal the experiences and emotions of a group of imprisoned people attempting to run the necessary day-to-day tasks of the lives they were forced to leave behind—as property owners, taxpayers, and proprietors. Through these letters about practical matters, readers can gain insight into the internees' changing family relations, their financial concerns, and their struggles in making decisions about an uncertain future. The book also includes essays that supply background information, analysis of the documents' contents and meaning, and historical context.

citizen gn 4w s manual: Citizen Participation in Multi-level Democracies Cristina Fraenkel-Haeberle, Sabine Kropp, Francesco Palermo, Karl-Peter Sommermann, 2015-03-20 *Citizen Participation in Multi-level Democracies* offers an overview of new forms of participatory democracy in federally and regionally organised multi-level states. Its four sections focus on the conceptual foundations of participation, the implementation and instruments of democracy, examples from federal and regional States, and the emergence of participation on the European level. There is today a growing disaffection amongst the citizens of many states towards the traditional models of representative democracy. This book highlights the various functional and structural problems with which contemporary democracies are confronted and which lie at the root of their peoples' discontent. Within multi-level systems in particular, the fragmentation of state authority generates feelings of powerlessness among citizens. In this context, citizens' participation can in many cases be a useful complement to the representative and direct forms of democracy.

citizen gn 4w s manual: Copular Clauses and Focus Marking in Sumerian Gábor Zólyomi, 2014-09-05 This work is the first comprehensive description of Sumerian constructions involving a copula. Using around 400 fully glossed examples, it gives a thorough analysis of all uses of the copula, which is one of the least understood and most frequently misinterpreted and consequently mistranslated morphemes in Sumerian. It starts with a concise introduction into the grammatical structure of Sumerian, followed by a study that is accessible to both linguists and sumerologists, as it applies the terminology of modern descriptive linguistics. It provides the oldest known and documented example of the path of grammaticalization that leads from a copula to a focus marker. It gives the description of Sumerian copular paratactic relative clauses, which make use of an otherwise only scarcely attested relativization strategy. At the end of the book, the reader will have a clear picture about the morphological and syntactic devices used to mark identificational, polarity and sentence focus in Sumerian, one of the oldest documented languages in the world.

While the need for a clean energy transition is clear, incoherently designed transition programs can pose complex environmental, social, and governance risks, including legal liability and protracted disputes. At the same time, the rush for minerals needed to manufacture clean energy technologies raises fundamental questions—most crucially, how to ensure the exploration and development of energy transition minerals in a manner that does not exacerbate resource conflicts, resource nationalism, human rights violations, protectionism, energy insecurity, social exclusions, and inequity, especially in conflict-affected and high-risk regions. By studying the legal and regulatory systems of Africa, Asia, Europe, Australasia, and North and South America through the themes of sovereignty, security and solidarity, *Net Zero and Natural Resources Law* provides an in-depth discussion of tools and techniques for addressing the legal and contract risks relating to the clean energy transition. This book offers a comprehensive and authoritative account of the nature, scope, and guiding principles of natural resources law and policy in a net zero era. Consideration is given to the integrated resource governance roadmap that is needed to improve coherence and coordination in the design, financing, and implementation of energy transition programs across the entire natural resource value chain.
