Sometimes, unplugging the mop and allowing it to cool before restarting can resolve minor glitches.

Water Leaks or Drips

Leaks can occur if the water tank is overfilled or the steam trigger is held down continuously. The manual advises:

- Filling only up to the designated maximum line.
- Using short bursts of steam rather than holding the trigger down for long periods.
- Inspecting the water tank seals for any damage or wear.

Proper handling reduces leaks and keeps your floors dry after cleaning.
