journal of librarianship and information science: A History of Modern Librarianship Pamela Spence Richards, Wayne A. Wiegand, Marija Dalbello, 2015-05-26 A broad, comparative history of librarianship, this intriguing work goes beyond the standard focus on institutions and collections to help you explore the part modern librarianship played—and continues to play—in forming Western cultures. Previous histories of libraries in the Western world—the last of which was published nearly 20 years ago—concentrate on libraries and librarians. This book takes a different approach. It focuses on the practice of librarianship, showing you how that practice has contributed to constructing the heritage of cultures. To do so, this groundbreaking collection of essays presents the history of modern librarianship in the context of recent developments of the library institution, professionalization of librarianship, and innovation through information technology. Organized by region, the book addresses the widely recognized, international impact of Anglo-American librarianship and its continuing influence over the past century, combining critical analysis with chronological histories of modern librarianship in Europe, North America, Australia/New Zealand, and Africa. An introductory chapter explains the origins of the project, and a concluding chapter examines the effects of digitization on modern librarianship in the 21st century.

journal of librarianship and information science: Bridging Research and Library Practice Krystyna K. Matusiak, Kawanna M. Bright, Debbie Schachter, 2023-11-20 Bridging the gap between research and practice communities is more pertinent than ever because of the need for evidence in developing and evaluating library services and programs. The gap between research and library practice has been discussed in the library and information science (LIS) field for almost two decades. The issues range from limited transfer of ideas from research into practice to a lack of education in research methods for library practitioners. This book introduces new voices from international research and practice communities into the discussion and contributes to the debate about the research-practice divide. Education and continuing training in research methods from international perspectives are explored and the experiences of researcher-practitioners from several countries highlight the issues. The volume includes chapters from LIS educators, academic researchers, and researcher-practitioners from 18 countries. It features the voices of instructors who teach research methods in LIS programs and library practitioners who engage in research. The book is addressed to the global audience of LIS educators and practitioners, with the goal of deepening the understanding of LIS education and training in research methods through sharing case studies and approaches to teaching and conducting research in practice.

journal of librarianship and information science: *Journals of the Century* Tony Stankus, 2019-12-06 This book, first published in 2002, gathers some of America's top subject expert librarians to determine the most influential journals in their respective fields. 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide. Their choices reflect the history of each discipline or profession, taking into account rivalries between universities, professional societies, for-profit and not-for-profit publishers, and even nation-states and international ideologies, in each journal's quest for reputational dominance. Each journal was judged using criteria such as longevity of publication, foresight in carving out its niche, ability to attract & sustain professional or academic affiliations,

opinion leadership or agenda-setting power, and ongoing criticality to the study or practice of their field. The book presents wholly independent reviewers; none are in the employ of any publisher, but each is fully credentialed and well published, and many are award-winners. The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty, students, and working professional clientele.
