social psychology 10th edition aronson: Psychoanalysis, Classic Social Psychology and Moral Living Paul Marcus, 2019-12-06 In *Psychoanalysis, Classic Social Psychology and Moral Living: Let the Conversation Begin*, Paul Marcus uniquely draws on psychoanalysis and social psychology to examine what affects the ethical decisions people make in their everyday life. Psychoanalysis traditionally looks at early experiences, concepts and drives which shape how we choose to behave in later life. In contrast, classic social psychology experiments have illustrated how specific situational forces can shape our moral behaviour. In this ground-breaking fusion of psychoanalysis and social psychology, Marcus gives a fresh new perspective to this and demonstrates how, in significant instances, these experimental findings contradict many presumed psychoanalytic ideas and explanations surrounding psychoanalytic moral psychology. Examining classic social psychology experiments, such as Asch's line judgement studies, Latané and Darley's bystander studies, Milgram's obedience studies, Mischel's Marshmallow Experiment and Zimbardo's Stanford Prison Experiment, Marcus pulls together insights and understanding from both disciplines, as well as ethics, to begin a conversation and set out a new understanding of how internal and external factors interact to shape our moral decisions and behaviours. Marcus has an international reputation for pushing boundaries of psychoanalytic thinking and, with ethics being an increasingly relevant topic in psychoanalysis and our world, this pioneering work is essential reading for psychoanalysts, psychoanalytic psychotherapists, moral philosophy scholars and social psychologists.

social psychology 10th edition aronson: *The Salience of Marketing Stimuli* Gianluigi Guido, 2012-12-06 In consumer and social psychology, salience has been generally treated as an attribute of a stimulus, which allows it to stand out and be noticed. Researchers, however, have only vaguely articulated the theoretical underpinnings of this term, thus impeding a thorough understanding of the perceptual processes behind its use in complex marketing communications. This book presents a theoretical approach for enhancing consumer processing and memory of marketing communication. Using schema theory and an information processing approach, the model introduced here - briefly referred to as the In-salience hypothesis emphasizes the nature of prominence which is intrinsic to any salience construct reviewed in literature. This model is part of wider Dichotic theory of salience, according to which a stimulus is salient either when it is incongruent in a certain context to a perceiver's schema, or when it is congruent in a certain context to a perceiver's goal. According to the four propositions of the model, in-salient stimuli are better recalled, affect both attention and interpretation, and are moderated by the degree of perceivers' comprehension (i.e., activation, accessibility, and availability of schemata), and involvement (i.e., personal relevance of the stimuli). Results of two empirical studies on print advertisements show that in-salient ad messages have the strongest impact in triggering ad processing which, in turn, leads to consumer awareness. The reading of this book is therefore recommended not only to academic scholars, but also to marketers especially planning ad campaigns and launches of new products.
