**history of modern art 7th edition used: An Introduction to the Making of Western Art** Susan L. Green, 2024-03-29 This book is the first introduction to Western art that not only considers how choice of materials can impact form, but also how objects in different media can alter in appearance over time, and the role of conservators in the preservation of our cultural heritage. The first four chapters cover wall and easel paintings, sculpture, drawings, and prints, from the late Middle Ages to the present day. They examine, with numerous examples, how these works have been produced, how they might have been transformed, and how efforts regarding their preservation can sometimes be misleading or result in controversy. The final two chapters look at how photography, new techniques, and modern materials prompted innovative ways of creating art in the twentieth century, and how the rapid expansion of technology in the twenty-first century has led to a revolution in how artworks are constructed and seen, generating specific challenges for collectors, curators, and conservators alike. This book is primarily directed at undergraduates interested in art history, museum studies, and conservation, but will also be of interest to a more general non-specialist audience.

The sheer number and proximity of works of painting, sculpture, and architecture in Florence can be so overwhelming that Florentine hospitals treat hundreds of visitors each year for symptoms brought on by trying to see them all, an illness famously identified with the French author Stendhal. While most guidebooks offer only brief descriptions of a large number of works, with little discussion of the historical background, Judith Testa gives a fresh perspective on the rich and brilliant art of the Florentine Renaissance in *An Art Lover's Guide to Florence*. Concentrating on a number of the greatest works, by such masters as Botticelli and Michelangelo, Testa explains each piece in terms of what it meant to the people who produced it and for whom they made it, deftly treating the complex interplay of politics, sex, and religion that were involved in the creation of those works. With Testa as a guide, armchair travelers and tourists alike will delight in the fascinating world of Florentine art and history.

**history of modern art 7th edition used:** *Joseph Beuys* Viola Michely, Claudia Mesch, 2007-06-27 Joseph Beuys is one of the most legendary figures of twentieth century art; his work and ideas continue to impact on artists today. An enigmatic, self-styled 'shaman' who embraced radically democratic artistic and political ideas, he has attained almost mythical status. This reader brings together the crucial texts on Beuys to look at the most contentious reception ever accorded a postwar artist. Here in one volume, are key essays by prominent artists and critics from North America and Europe, in a collection which foregrounds the full scope of Beuys' work across performance, drawing, painting, sculpture and multiples. With a foreword by Arthur C Danto, Joseph Beuys: The Reader features Benjamin Buchloh's seminal essay 'Beuys: The Twilight of the Idol' and texts by Rosalind Krauss, Peter Burger, Vera Frenkel, Irit Rogoff, Thierry de Duve and others, as well as essays translated for the first time into English. Also included are two discussions, previously unpublished outside of Germany, with Beuys himself, as well as a useful chronology of key events and exhibitions in the life of this most charismatic figure. The most significant collection of texts on this artist to date, the book will be essential reading for any student of Beuys and for all those interested in postwar art, the cult of the artist, and art's engagement with politics and society.

They are sites of a seemingly peaceful cohabitation between the elitist and the popular, where the likes of Jeff Koons encounter the likes of Guy Debord, where Angela Davis and Frantz Fanon share the same ground with neoliberal cultural policy makers and creative entrepreneurs. Building on the legacy of events that conjoin art, critical theory and counterculture, from Nova Convention to documenta X, the new biennial blends the modalities of protest with a neoliberal politics of creativity. This book examines a strained period for these high art institutions, a period when their politics are brought into question and often boycotted in the context of austerity, crisis and the rise of Occupy cultures. Using the 3rd Athens Biennale and the 7th Berlin Biennale as its main case studies, it looks at how the in-built tensions between the domains of art and politics take shape when spectacular displays attempt to operate as immediate

activist sites. Drawing on ethnographic research and contemporary cultural theory, this book argues that biennials both denunciate the aesthetic as bourgeois category and simultaneously replicate and diffuse an exclusive sociability across social landscapes.
