Professor of Culinary History Andrew Smith and nearly 200 authors bring together in 770 entries the scholarship on wide-ranging topics from airline and funeral food to fad diets and fast food; drinks like lemonade, Kool-Aid, and Tang; foodstuffs like Jell-O, Twinkies, and Spam; and Dagwood, hoagie, and Sloppy Joe sandwiches.

campbell hotel guide: Accommodating the Republic Kirsten E. Wood, 2023-11-08 People have gathered in public drinking places to drink, relax, socialize, and do business for hundreds of years. For just as long, critics have described taverns and similar drinking establishments as sources of individual ruin and public disorder. Examining these dynamics as Americans surged westward in the early nineteenth century, Kirsten E. Wood argues that entrepreneurial, improvement-minded men integrated many village and town taverns into the nation's rapidly developing transportation network and used tavern spaces and networks to raise capital, promote innovative businesses, practice genteel sociability, and rally support for favored causes—often while drinking the staggering amounts of alcohol for which the period is justly famous. White men's unrivaled freedom to use taverns for their own pursuits of happiness gave everyday significance to citizenship in the early republic. Yet white men did not have taverns to themselves. Sharing tavern spaces with other Americans intensified white men's struggles to define what, and for whom, taverns should be. At the same time, temperance and other reform movements increasingly divided white men along lines of party, conscience, and class. In both conflicts, some improvement-minded white men found common cause with middle-class white women and Black activists, who had their own stake in rethinking taverns and citizenship.

campbell hotel guide: Recipes for Respect Rafia Zafar, 2019-03-15 Food studies, once trendy, has settled into the public arena. In the academy, scholarship on food and literary culture constitutes a growing river within literary and cultural studies, but writing on African American food and dining remains a tributary. Recipes for Respect bridges this gap, illuminating the role of foodways in African American culture as well as the contributions of Black cooks and chefs to what has been considered the mainstream. Beginning in the early nineteenth century and continuing nearly to the present day, African Americans have often been stereotyped as illiterate kitchen geniuses. Rafia Zafar addresses this error, highlighting the long history of accomplished African Americans within our culinary traditions, as well as the literary and entrepreneurial strategies for civil rights and respectability woven into the written records of dining, cooking, and serving. Whether revealed in cookbooks or fiction, memoirs or hotel-keeping manuals, agricultural extension bulletins or library collections, foodways knowledge sustained Black strategies for self-reliance and dignity, the preservation of historical memory, and civil rights and social mobility. If, to follow Mary Douglas's dictum, food is a field of action—that is, a venue for social intimacy, exchange, or aggression—African American writing about foodways constitutes an underappreciated critique of the racialized social and intellectual spaces of the United States.
