juan ibarra political views: The Chinese Political Novel Catherine Vance Yeh, 2020-05-11

The political novel, which enjoyed a steep yet short rise to international renown between the 1830s and the 1910s, is primarily concerned with the nation's political future. It offers a characterization of the present, a blueprint of the future, and the image of the heroes needed to get there. With the standing it gained during its meteoric rise, the political novel helped elevate the novel altogether to become the leading literary genre of the twentieth century worldwide. Focusing on its adaptation in the Chinese context, Catherine Vance Yeh traces the genre from Disraeli's England through Europe and the United States to East Asia. Her study goes beyond comparative approaches and nation-state- and language-centered histories of literature to examine the intrinsic connections among literary works. Through detailed studies, especially of the Chinese exemplars, Yeh explores the tensions characteristic of transcultural processes: the dynamics through which a particular, and seemingly local, literary genre goes global; the ways in which such a globalized literary genre maintains its core features while assuming local identity and interacting with local audiences and political authorities; and the relationship between the politics of form and the role of politics in literary innovation.

juan ibarra political views: The Triumph of Politics George Philip, Francisco Panizza, 2013-05-06 The Triumph of Politics offers a comparative and historical interpretation of Venezuela's Chavez, Bolivia's Morales and Ecuador's Correa - South America's most prominent '21st century socialists'. It argues that the claims of these 21st century socialists should be taken seriously even though not necessarily at face value. The authors show how the consensual market oriented policymaking that characterized almost all of South America in the 1990s has now given way to something quite different. Polarization and intense political conflict have returned to much of the region. Although the Left has not always been the beneficiary of this changed pattern, the '21st century' governments of Chavez, Morales and Correa have been agenda setters. The questions raised by their emergence, style of governance and policy orientations resonate across Latin America and beyond. It is likely that the kind of politics with which they have been associated will be influential in the region for quite some time to come.

agriculture.

Cockcroft, 1968 This book is a case study of intellectuals in the Mexican Revolution, with specific reference to four men from San Luis Potosi, known in Mexico as the cradle of the Revolution. These four men--engineer Camilo Arriaga, journalist Juan Sarabia, school teacher Librado Rivera, and student and lawyer Antonio Diaz Soto y Gama--played leadership roles in the Precursor Movement, commonly defined as all political precedents of the Revolution of 1910-1917, including the manifestoes, strikes, and armed uprisings dating from these men's founding of San Luis Potosi's Club Liberal Ponciano Arriaga in 1900 to the outbreak of the Revolution in 1910.

juan ibarra political views: *Dirty War, Clean Hands* Paddy Woodworth, 2002-01-01 Spain's transition from the Franco dictatorship to a democratic state has been widely regarded as exemplary. However, as modern court proceedings have exposed, the first post-transition government, in attempting to destroy the Basque separatist group ETA, adopted the very policies of indiscriminate terror which characterised both the Franco regime and ETA's own strategy. In this

narrative Woodworth disentangles a complex conspiracy through documentary evidence and first-hand interviews. He analyzes what happens when a democracy abandons the rule of law, showing how state terror has strengthened revolutionary terrorism and raising questions about post-Franco Spain.

Costeloe, 2002-10-03 Much of the so-called Age of Santa Anna in the history of independent Mexico remains a mystery and no decade is less well understood than the years from 1835 to 1846. In 1834, the ruling elite of middle class *hombres de bien* concluded that a highly centralised republican government was the only solution to the turmoil and factionalism that had characterised the new nation since its emancipation from Spain in 1821. The central republic was thus set up in 1835, but once again civil strife, economic stagnation, and military coups prevailed until 1846, when a disastrous war with the United States began in which Mexico was to lose half of its national territory. This study explains the course of events and analyses why centralism failed, the issues and personalities involved, and the underlying pressures of economic and social change.
